CONTENTS

Number 1

E. G. Youngs. The contribution of physics to land drainage 1

A. C. D. Newman. The specific surface of soils determined by water sorption 23

J. J. Leeson and D. J. Campbell. The variation of soil critical state parameters with water content and its relevance to the compaction of two agricultural soils 33

K. R. J. Smettem and S. T. Trudgill. An evaluation of some fluorescent and non-fluorescent dyes in the identification of water transmission routes in soils 45

L. Madrid, E. Díaz, F. Cabrera and P. de Arambarri. Use of a three-plane model to describe charge properties of some iron oxides and soil clays 57

K. W. T. Goulding. Adsorbed ion activities and other thermodynamic parameters of ion exchange defined by mole or equivalent fractions 69

S. P. Cuttle. Chemical properties of upland peats influencing the retention of phosphate and potassium ions 75

M. A. Wilson, S. Heng, K. M. Goh, R. J. Pugmire and D. M. Grant. Studies of litter and acid insoluble soil organic matter fractions using ^{13}C-cross polarization nuclear magnetic resonance spectroscopy with magic angle spinning 83

J. Dunbar and A. T. Wilson. The origin of oxygen in soil humic substances 99

M. V. Cheshire, G. P. Sparling and C. M. Mundie. Effect of periodate treatment of soil on carbohydrate constituents and soil aggregation 105

B. L. Williams. The nitrogen content of particle size fractions separated from peat and its rate of mineralization during incubation 113

J. A. Rother, J. W. Millbank and I. Thornton. Nitrogen fixation by white clover (*Trifolium repens*) in grasslands on soils contaminated with cadmium, lead and zinc 127

A. B. McBratney and R. Webster. Optimal interpolation and isarithmic mapping of soil properties. V. Co-regionalization and multiple sampling strategy 137

Dieke Postma. Pyrite and siderite oxidation in swamp sediments 163

D. G. Kinniburgh and P. H. T. Beckett. Geochemical mapping in Oxfordshire: a comparison of stream sediment and soil sampling 183

P. Kane and C. J. B. Mott. Non-destructive separation of discrete pedogenic features from soils 205

Books on Soil Science Recently Received; Erratum 213

Number 2

J. A. Currie. Gas diffusion through soil crumbs: the effects of wetting and swelling 217

M. McGowan, S. R. Wellings and G. J. Fry. The structural improvement of damaged clay subsoils 233

Jens Raunsø Jensen. Chloride dispersion in packed columns during saturated steady flow 249

S. Staunton and P. H. Nye. The self diffusion of sodium in a naturally aggregated soil 263

P. S. Blackwell. Measurements of aeration in waterlogged soils: some improvements of techniques and their application to experiments using lysimeters 271

Yutaka Okamura and Koji Wada. Electric charge characteristics of horizons of Ando (B) and Red-Yellow B soils and weathered pumices 287

M. A. Wilson, P. J. Collin and K. R. Tate. ^{1}H-nuclear magnetic resonance study of a soil humic acid 297

M. A. Wilson and K. M. Goh. N.M.R. spectroscopy of soils: structure of organic material in sodium deuteroxide extracts from Patua loam, New Zealand 305

J. R. Sanders. The effect of pH on the total and free ionic concentrations of manganese, zinc and cobalt in soil solutions 315

R. G. McLaren, J. G. Williams and R. S. Swift. Some observations on the desorption and distribution behaviour of copper with soil components 325

O. K. Borggaard. The influence of iron oxides on phosphate adsorption by soil 333

T. M. Addiscott. Kinetics and temperature relationships of mineralization and nitrification in Rothamsted soils with differing histories 343

J. C. Ryden. Denitrification loss from a grassland soil in the field receiving different rates of nitrogen as ammonium nitrate 355

R. J. Dowdell, R. Crees and R. Q. Cannell. A field study of effects of contrasting methods of cultivation on soil nitrate content during autumn, winter and spring 367

G. P. Sparling. Estimation of microbial biomass and activity in soil using microcalorimetry 381

M. Pagliai, M. La Marca and G. Lucamante. Micromorphometric and micromorphological investigations of a clay loam soil in viticulture under zero and conventional tillage 391

Number 3

W. J. GOEDERT. Management of the Cerrado soils of Brazil: a review 405

G. D. TOWNER. Effective stresses in unsaturated soils and their applicability in the theory of critical state soil mechanics 429

G. J. CHURCHMAN and D. PAYNE. Mercury intrusion porosimetry of some New Zealand soils in relation to clay mineralogy and texture 437

J. K. HENSHALL and D. J. CAMPBELL. The calibration of a high resolution gamma-ray transmission system for measuring soil bulk density and an assessment of its field performance 453

D. G. PYATT and K. A. SMITH. Water and oxygen regimes of four soil types at Newcastleton Forest, south Scotland 465

D. BARRACLOUGH, M. J. HYDEN and G. P. DAVIES. Fate of fertilizer nitrogen applied to grassland. I. Field leaching results 483

K. R. J. SMETTEM, S. T. TRUDGILL and A. M. PICKLES. Nitrate loss in soil drainage waters in relation to by-passing flow and discharge on an arable site 499

K. MURRAY and P. W. LINDER. Fulvic acids: structure and metal binding. I. A random molecular model 511

M. SPITELLER and M. SCHNITZER. A comparison of the structural characteristics of polymaleic acid and a soil fulvic acid 525

M. V. CHESHIRE, C. M. MUNDIE, J. M. BRACEWELL, G. W. ROBERTSON, J. D. RUSSELL and A. R. FRASER. The extraction and characterization of soil polysaccharide by whole soil methylation 539

D. E. POMEROY. Some effects of mound-building termites on the soils of a semi-arid area of Kenya 555

V. C. FARMER, J. D. RUSSELL and B. F. L. SMITH. Extraction of inorganic forms of translocated Al, Fe and Si from a podzol Bs horizon 571

P. A. BURROUGH. Multiscale sources of spatial variation in soil. I. The application of fractal concepts to nested levels of soil variation 577

P. A. BURROUGH. Multiscale sources of spatial variation in soil. II. A non-Brownian fractal model and its application in soil survey 599

P. A. COSTIGAN, D. J. GREENWOOD and T. MCBURNEY. Variation in yield between two similar sandy loam soils. I. Description of soils and measurement of yield differences 621

P. A. COSTIGAN and T. MCBURNEY. Variation in yield between two similar sandy loam soils. II. Causes of yield variation in cabbage and lettuce crops 639

Number 4

M. A. A. Cox. Analysis of a moisture characteristic curve employing a crystalline lattice of capillary pores 649

M. J. Goss and E. G. Youngs. The use of horizontal piezometers for *in situ* measurements of hydraulic conductivity below the water table 659

N. Hardy, I. Shainberg, M. Gal and R. Keren. The effect of water quality and storm sequence upon infiltration rate and crust formation 665

P. H. Nye. The diffusion of two interacting solutes in soil 677

P. R. Darrah, P. H. Nye and R. E. White. Diffusion of NH_4^+ and NH_3^- mineralized from organic N in soil 693

T. M. Addiscott, V. H. Thomas and M. A. Janjua. Measurement and simulation of anion diffusion in natural soil aggregates and clods 709

P. Rengasamy. Clay dispersion in relation to changes in the electrolyte composition of dialysed red-brown earths 723

N. J. Barrow. A mechanistic model for describing the sorption and desorption of phosphate by soil 733

N. J. Barrow. On the reversibility of phosphate sorption by soils 751

D. G. Kinniburgh. The H^+/M^{2+} exchange stoichiometry of calcium and zinc adsorption by ferrihydrite 759

Alison R. Tills and B. J. Alloway. The use of liquid chromatography in the study of cadmium speciation in soil solutions from polluted soils 769

P. J. Cressey, G. R. Monk, H. K. J. Powell and D. J. Tennent. Fulvic acid studies: evidence for a polycarboxylate co-ordination mode at soil pH 783

N. Senesi, C. Testini and M. Polemio. Chemical and spectroscopic characterization of soil organic matter fractions isolated by sequential extraction procedure 801

H. Tiessen, J. W. B. Stewart and J. O. Moir. Changes in organic and inorganic phosphorus composition of two grassland soils and their particle size fractions during 60–90 years of cultivation 815

M. B. McBride, B. A. Goodman, J. D. Russell, A. R. Fraser, V. C. Farmer and D. P. E. Dickson. Characterization of iron in alkaline EDTA and NH_4OH extracts of podzols 825

A. J. Melfi, C. C. Cerri, B. I. Kronberg, W. S. Fyfe and B. McKinnon. Granitic weathering: a Brazilian study 841
